

Policybazaar- Frontend Developer

Interview Process

Round 1: Telephonic Interview

Round 2: Technical Round

Round 3: Coding Round

Round 4: HR Round

Interview Questions

1. How would you structure the HTML and CSS for a form on Policybazaar's website to collect user insurance information?
2. Describe your approach to creating responsive design for Policybazaar's website to ensure compatibility across different devices and screen sizes.
3. How do you ensure accessibility standards are met in the design and implementation of Policybazaar's user interface?
4. How would you implement client-side form validation for insurance-related input fields on Policybazaar's website?
5. Explain how you would handle user interactions such as calculating insurance premiums dynamically based on user input.
6. Discuss your experience with front-end frameworks like React or Angular and how they could be utilized in Policybazaar's frontend development.
7. How would you improve the user experience of Policybazaar's quote comparison process?
8. What considerations would you take into account when designing a dashboard for Policybazaar users to manage their insurance policies?
9. How do you ensure fast load times for Policybazaar's web pages, especially considering the large amount of data involved in insurance comparisons?
10. Discuss techniques for optimizing images and other media assets for performance on Policybazaar's platform.
11. Have you worked with APIs before? How would you integrate external APIs into Policybazaar's frontend to fetch insurance quotes from different providers?
12. Describe how you would handle authentication and authorization when making API requests on Policybazaar's platform.
13. What security measures would you implement to protect user data on Policybazaar's website?
14. How do you prevent common security vulnerabilities like SQL injection attacks in frontend development?
15. What testing frameworks or tools have you used in your front-end development projects?

16. How would you approach testing Policybazaar's frontend codebase to ensure its reliability and performance?
17. Describe your experience working in agile development environments and how you collaborate with other team members.
18. How do you stay updated with the latest trends and technologies in front-end development?
19. Can you discuss a challenging problem you encountered in a previous project and how you solved it?
20. How do you manage state in React?
